

# Quorum® onQ™ Flex Solution

## The Best Disaster Recovery Product on the Market Today

onQ Flex is an extension to Quorum’s award-winning and patented onQ Disaster Recovery as a Service (DRaaS) product that delivers the world’s most advanced High Availability and Disaster Recovery when you need it. Quorum’s Disaster Recovery on Demand technology offers customers the ability to spin up recovery nodes in the event of a disaster. onQ Flex combines Disaster Recovery on Demand and Instant Disaster Recovery capabilities to delivery priority recovery to mission critical servers. onQ Flex is the only product on the market that offers Disaster Recovery on Demand and Instant Disaster Recovery giving customers the same benefits as replicated datacenter, in a simple and powerful way at an affordable cost.

## How does it work?

Within days of set up, Quorum DRaaS experts will have handled every aspect of deployment to ensure a high availability appliance on site, protecting servers against failures. In case of a disaster, a recovery node is spun up on demand and companies will be back in business.

## Flex IT Power

onQ Flex allows businesses to prioritize based on the level of protection you want for each server. onQ Flex is the only solution available that allows administrators to assign the different recovery levels to each server in an IT environment. The varying levels of protection allows businesses to meet their RTO needs.

## Flex IT Budget

onQ flex Disaster Recovery on Demand allows businesses to only pay for what you need, when you need it. onQ Flex leverages Quorum’s technology while controlling cost through on demand disaster recovery.

## Flex IT Planning

onQ Flex adapts to growing businesses. onQ Flex allows for easy change from DR on Demand to Instant DR as mission critical servers grow and RTO requirements change.

## onQ Flex Provides

- **Instant Disaster Recovery** - Up-to-date virtual clones of Instant DR protected servers are ready-to-run on local appliance and/or in the Cloud with just one click
- **Recovery on Demand** - a recovery node is created using the latest backup and can be started as needed in the Cloud
- **Simple Management** - no specialized knowledge is needed to use onQ’s browser interface
- **Rapid Deployment** - no multi-month complex protects and integration services...onQ has you protected in hours
